CNG STATIONS

Mother, Daughter & Fueling Stations

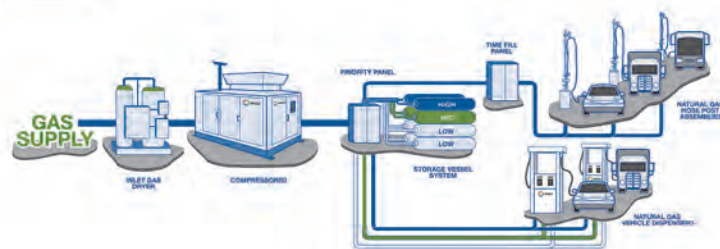

Mena Tradex has the technical ability to supply and commission mother stations, daughter stations, stand alone and integrated pressure reduction, regulation and vehicle fueling stations.

Mena Tradex could also assist in the selection and sizing of the stations by properly assessing the demands of the client and targeted area.

Excellent Quality Reliable Durability Outstanding Performance

Almost three decades with a perfect track record in designing, supplying, erecting and commissioning projects in the gas field. Our services also include technical and aftersales support as well as maintenance

We Make it Happen

Vehicle Fueling

CNG fueling stations with capacities extending from 5m³/hr reaching 2000m³/hr and more

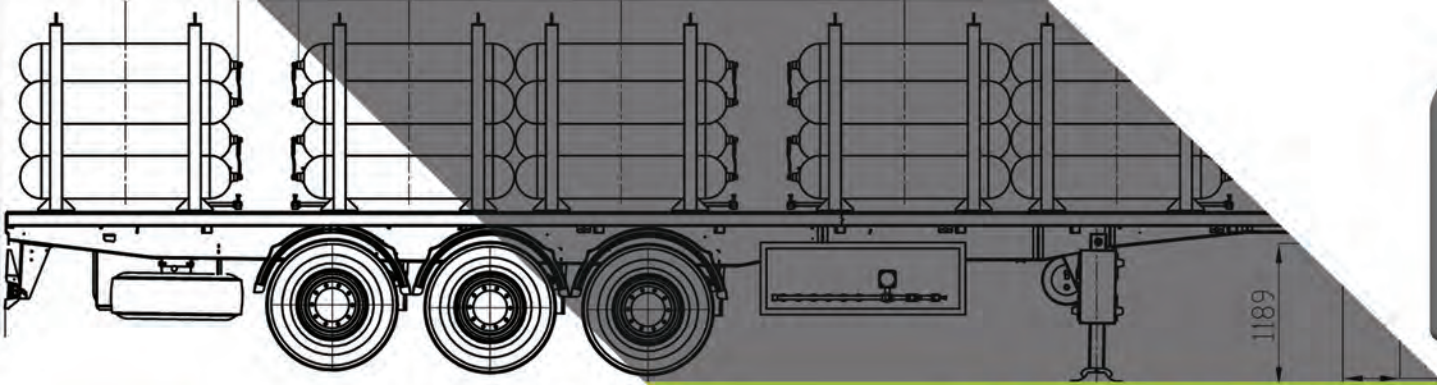

Pressure Reduction

Single and dual line pressure reduction and regulation covering different inlet and outlet pressures with tailored flow

Compressors

Durable design with a wide range of inlet pressures and flow parameters with EXDII BT4 protection grade

OUR PRODUCT RANGE

Mena Tradex supplies tailor made CNG Bulk Transport & Delivery Systems to meet all requirements. Our systems have a MAWP of 200 upto 300 Bar based on the needed specifications. All units are tailored to cover every detail facilitating the daily operation using type I, II, III or IV CNG cylinders and tubes.

BULK CNG TRANSPORT SOLUTIONS

WHY MENA TRADEX?

EFFICIENCY

- + Guaranteed efficiency with unique performance as a result of endless hours of R&D

QUALITY

- + All the material used in manufacturing our equipment are carefully selected with smart design and exclusive finishing

SUPPORT

- + To ensure the maximum benefit, reliability and performance, Mena Tradex provides full scale customer support

Tube Trailers

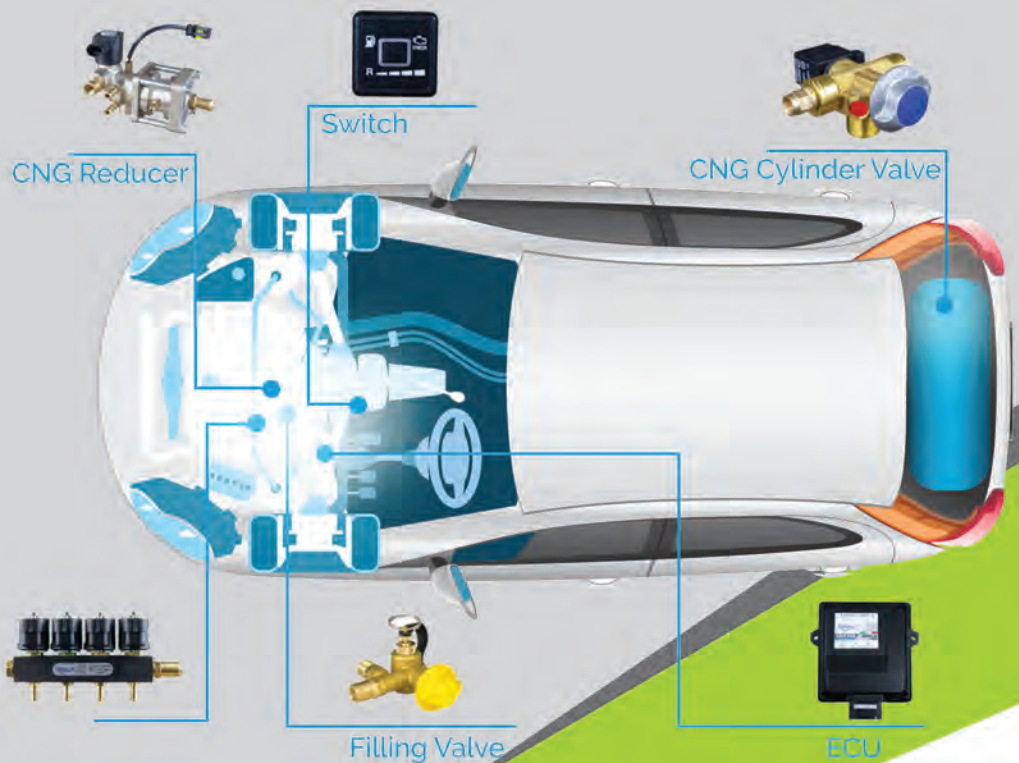

MEGC Trailers

20' & 40' Skid Containers

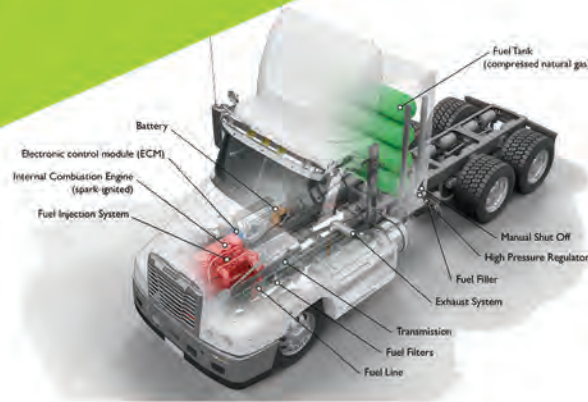

Different Sized Bundles

VEHICLE CONVERSION

Our mission is to create innovative products for the optimal use of CNG for all types of vehicles preserving the performance with low environmental impact

Components

Mena Tradex supplies eco-friendly conversion kits with all necessary modules, valves, fittings connections and tanks

Reducers

The reducer is designed to obtain the best vaporization in all environmental conditions

Valves & Fittings

Our range includes different models of manual and automatic filling, cylinder, connection and check valves as well as interchangeable fittings

ECU For Diesel Kits

Diesel Dual Fuel kits are customized products specifically designed based on the characteristics of Diesel Vehicles

Gasoline Sequential Kits

Highly accurate and efficient EASY GAS Direct Injection CNG Kits & Minikits

CNG Filters

CNG Filters always guaranteeing flawless performance

Control Switch

To select type of fuel, equipped with 5 LED indicators and automatic buzzer
